DIEP TUNG.

Backend & AI Automation Developer

Hanoi, Vietnam 0388 674 005 dieptung20102005@gmail.com github.com/zieptung LinkedIn

SUMMARY

Third-year Information Systems student focused on backend and RESTful APIs, currently learning C# with ASP.NET Core. Builds AI agents and automation so repetitive work runs on its own.

EXPERIENCE

AI Agent & Automation
2026 – Present

Novamed

- Build AI agents on OpenClaw for each department, starting with the Technical department.
- Connect bots through Telegram and Bitrix24.
- Automate the daily ticket summary.
- Trial an AI digital assistant for staff.

PROJECTS

Student Management API
2026

Node.js · Express · MySQL

RESTful API for managing student records, with create, read, update and delete endpoints, built on the MVC pattern.

github.com/zieptung/student-api

Student Course Registration System
2026

C# · .NET Desktop

Desktop app for course credit registration, with admin screens for students, lecturers, subjects, course sections and users.

github.com/zieptung/StudentCourseRegistrationSystem

Student Management Website (btaplon)
2025

PHP · CSS · JavaScript

Website with separate areas for admins, lecturers and students, including login and an admin area.

github.com/zieptung/btaplon
